

Top Quality Physiotherapy Practice

Women's & Men's Health Physiotherapy (WMHP) has been recognised for the quality and safety of their service with the award of reaccreditation by *Quality Innovation Performance (QIP)*. WMHP has been an accredited practice for 18 years.

QIP is Australia's most comprehensive not-for-profit accreditation organisation, dedicated to delivering accreditation and support services to a diverse range of organisations including physiotherapy practices, diagnostic imaging services, dental practices and community services.

"Accreditation is a major achievement and a clear demonstration that WMHP is committed to providing access to high quality health services," Mr Gary Smith, Chair of QIP, said. "Striving to continually improve how you support your patients to get the best health outcomes should be commended, and QIP congratulates WMHP on reaching this benchmark over such a long period of time", said Gary.

QIP accreditation is based on national standards that are set by the Australian Physiotherapy Association (APA). The APA is the peak body representing the interests of Australian physiotherapists and their patients. To achieve an endorsement of accreditation, WMHP has demonstrated that they meet all requirements of the APA Standards.

Shan Morrison, WMHP Director, said accreditation was attained through cooperation, commitment and communication amongst staff members.

"Everyone in the practice played a valuable role in ensuring we met the Standards. The recognition of working in an accredited practice gives our dedicated staff a feeling of accomplishment and pride.

WMHP is proud to display the QIP accredited symbol at both our practice locations.

"We want to communicate to our patients that their well-being is our priority. QIP accreditation shows we are committed to providing quality care based on professional Standards," said Shan.

WMHP located at both 549 Burke Rd, Camberwell and 170 Thomas St, Hampton, offers a range of physiotherapy services specialising exclusively in bladder, bowel and pelvic floor problems, pelvic pain and the discomforts of pregnancy.
